**The Brother GT-782
Coming Soon – Spring 2009**

The Brother GT-782, a dual platen inkjet garment printer with independently operated platens capable of high volume production including dark garments, will be the perfect inkjet garment printer for mid-to-high volume shops. Because of its unique ability to print multiple prints simultaneously, your production will increase as a result of reduced cycle times and fast flexible downloading of new images.

Succeeding the heritage of Brother's GT-541 with a brand-new high-performance platform, the new GT-782 garment printer will boast the following powerful features:

- Print two garments virtually simultaneously and independently – for maximum productivity and the potential for greater profitability for high volume decorators
- Brother's genuine white ink and ink cartridge system provides speed, superb output quality, easy maintenance, and more economical operations
- No separate and costly RIP (raster image processor) is required
- Print driver software can directly interface with most of the popular graphic applications, such as Adobe Photoshop and CorelDraw, for seamless white ink prints
- Extra-large print area of 16" x 18"
