Mimaki announces the compact desktop inkjet printer UJF-3042 employing UV LED technology

February 3, 2010, Mimaki USA, INC., Suwanee, GA

Mimaki Engineering Co., Ltd., a leading manufacturer of wide-format inkjet printers and cutting machines for the sign/graphics, industrial and textile/apparel markets introduces UJF-3042, a desktop UV LED printer for short run production and imprints of industrial products, novelties, cards and nameplates, electronics covers as well as label and packaging applications. Apart from its versatility the UJF-3042 excels in low investment costs, very good value for money and print quality.

Now Mimaki introduces the UJF-3042, a desktop size UV LED inkjet printer that combines Mimaki's highly developed UV LED technology with the engineering knowledge from earlier UV inkjet printers thus enabling highly detailed, precise and brilliant images on non-coated substrates. The machine incorporates a new developed inkjet print head that fits the requirements of this compact printer and enables an exceptionally good value for money proposition. Its cost-efficient features include lower energy costs due to the implementation of UV LED as well as broader media choices. Thus cards, packaging, labels, stickers and display production but also imprinting of novelties, nameplates, electronics covers and other industrial products is made possible.

Benefits

1. Excellent value for money: High image quality with a maximum resolution of 1440 x 1200 dpi and white over and underprint functionality on substrates up to 1.97 inches. Mimaki's RIP software is included in the standard package.
2. Broader media choices: UV LED technology enables printing on heat-sensitive media such as acrylics. In addition UJF-3042 prints on non-coated substrates such as glass, wood and metals that can be finished with a resin finishing enabling outstandingly effects for long usage with excellent scratch resistance.
3. Equipped with Mimaki's Spray Suppressor system that enhances consistency.
4. Environmentally friendly: UV LEDs require less energy and the diodes have a far longer lifetime.

5. Print speed: Prints in A3 size 11.81 x 16.54 inches can be printed in high speed mode within four minutes in full color plus white (over and underprint). UJF-3042 prints precise, vivid images with variable dots up to a maximum resolution of 1440 x 1200 dpi.
6. Compact size: The UJF-3042 can be installed in office environments requiring only an entrance space of 35.43" width for installation.

US Price \$36,995

Package includes: UJF-3042 and RasterLink Pro 5IP RIP software

Shipment commences: March 1, 2010

ABOUT MIMAKI USA

Mimaki USA, Inc., headquartered in Suwanee, Georgia, was incorporated in 1999 and is the US subsidiary of Mimaki Engineering Company, Ltd. based in Nagano, Japan. Mimaki is a leading manufacturer of wide-format inkjet printers and cutting machines for the sign/graphics, industrial and textile/apparel markets. Mimaki develops the complete product range for each group; hardware, software and the associated consumable items, such as inks and cutting blades. Mimaki excels in offering innovative, high quality and high reliability products, based upon its aqueous, solvent and UV-curable inkjet technology. In order to meet a wide range of applications in the market, Mimaki pursues the development of advanced on-demand digital printing solutions.
